Background

Why should San Francisco prioritize equity?

While San Francisco has made progress in reducing greenhouse gas emissions, it has been falling short in other ways. Income inequality is growing, and housing insecurity, homelessness, and displacement are also worsening. These disparities, among others, are more pronounced when intersected with race. American Indian, Black, and other people of color continue to face significant income inequality, poor health outcomes, exposure to environmental pollutants, low homeownership rates, high eviction rates, and poor access to healthy food, quality and well-resourced schools, and infrastructure. In 2021, the median household income in San Francisco was $121,826. Households which were white alone, not of Hispanic/Latinx origin, had median income of $165,332, which is more than twice the median income for Hispanic/Latinx households, which was $75,458. Median income for Asian households was $104,573 and Black households $46,163. American Indian households had a median income of $53,848. Most housing cost burdened households are extremely low- and very low-income households. Black and Hispanic/Latinx renters face the highest rates of cost burden with nearly half of both groups cost burdened or severely cost burdened. Asian and Pacific Islander renters also experience elevated rates of cost burden. The American Indian population is 17 times more likely to be homeless compared to their share of population, and Black households are seven times more likely. In 2021, in San Francisco, Black residents made up 5.3 percent of the city’s population, when these residents had previously made up 11 percent of the city's total population in 1990. In the time span of 25 years, the proportion of the Black population in San Francisco was reduced by half, a far more rapid decline than the rest of the Bay Area.

Across every social indicator, when data is disaggregated by race, the legacy of more than two hundred years of racially discriminatory government policies is evident in San Francisco. Racial disparities can be measured in unemployment, health, household income, housing and displacement, criminal justice, police violence, homelessness, education, and composition of the City and County of San Francisco workforce. Climate change exacerbates these disparities. People of color and low-income residents are least responsible for, yet most vulnerable to the impacts of climate change. Strategies to reduce greenhouse gas emissions have the potential to exacerbate disparities if not intentionally designed for equity. With the update to San Francisco’s Climate Action Plan (CAP), the intent is to go beyond traditional emissions reduction strategies and intentionally design strategies that advance racial and social equity.

Leading with Race

This assessment prioritizes equity for Black, Indigenous, and People of Color (BIPOC), low-income populations, and/or other vulnerable populations through the lens of intersectionality. The additional vulnerable populations are defined in the document as: older adults, youth, homeless or marginally housed residents, non-English speaking people, immigrants, people with disabilities, people who are socially isolated, and people with pre-existing health conditions. This assessment leads with race because society produces unequal outcomes for BIPOC, and there is an intersectionality between race and other forms of marginalization. Intersectionality refers to the interconnected nature of social categorizations as they apply to a given individual or group, regarded as creating overlapping and interdependent systems of discrimination or disadvantage. When race is intersected with any other disadvantaged social categorization the outcomes for that individual or group are worse. If not designed specifically to advance racial equity, a solution is less likely to be successful at reducing racial disparities. However, data are not always collected about race. Disparities in wealth and income by race are well documented in San Francisco and the Bay Area. While not identical, issues faced by low-income populations may be representative of issues faced by some communities of color. Similar to race, poverty and/or financial insecurity exacerbates the disadvantage and marginalization experienced as a result of certain other social categorizations. Poverty and racial and ethnic inequality are the two foundational issues identified in the 2019 San Francisco Health Needs Assessment.

Level of Equity

Interventions to reduce disparities and advance equity vary in scope; they can take the form of targeted benefits and specialized program design, or be designed to address the fundamental drivers of the inequity. Equity can be advanced by providing inclusive access to benefits by removing barriers and targeting investment, such as providing subsidies for green technologies to those who can’t afford them. These strategies work to deliver benefits from a particular program to populations who may not have had access, and can work to protect the most vulnerable. Strategies which address the root cause of the vulnerability, inequity, and/or barrier take equity work deeper. For example, instead of only asking the question, “How can we provide the benefits of green technologies to those who can’t afford them?”, a root cause analysis would result in the question, “Why can’t some people afford green technologies and how can we address those underlying issues (such as disparities in income and wealth accumulation)?”

Assessment Process

The assessment enables strategy developers to identify opportunities to provide benefits to all San Franciscans, mitigate negative unintended consequences for BIPOC, low-income populations, and other vulnerable populations and, where possible, address the root causes and fundamental drivers of inequity. RSEAT was developed through stakeholder engagement on residential building decarbonization collaboratively led by SFE, People Organizing to Demand Environmental and Economic Justice (PODER), and Emerald Cities San Francisco Bay Area, consulting literature, the Equity Assessment Tool prepared by Race Forward for the Zero Cities Project and guidance from the Office of Racial Equity (ORE) and the Planning Department’s Community Equity Team. Five Themes and supporting Impact Areas are addressed under RSEAT: 1) Income and wealth equality (including Just Transition for workers); 2) Housing security and community stability; 3) Inclusion and empowerment; 4) Health; and 5) Hazard and climate resilience. The Examples of Progress column in the tool provides more information about how to track progress on each of the Key Statements. Some of these Examples are population-level data. It is difficult to attribute changes in these indicators to any individual strategy, as there are many contributing factors to systemic problems. The complex nature of systemic problems can result in a lack of accountability, where individual initiatives determine the systemic problem to be outside of certain project scope. The examples can be used to guide the development of the project considerations so that recommendations feed into ongoing population-level measurement.

ORE guided the development of a Scale to evaluate the potential of a strategy to:

+2 Repair root causes of racial disparities; dismantle systems of oppression; structural and systemic changes such as large policy and budgetary action
+1 Mitigate symptoms of systemic racism; interpersonal and operational changes; working within the current system to make it better such as through inclusive access to existing services
-1 Maintain the status quo of racial disparities
-2 Perpetuate racial disparities and harm

### Recommendations from SFE Equity Analysts

**Key equity concerns identified:**

**Recommendations to advance racial and social equity:**

| Increase in resources to address barriers to stable employment, including commutes, childcare, etc. |
| - Improved worker health and safety |
| - Largest polluter/ Most responsible party pays for the transition |

### Revisions

**Modify strategy and/or supporting action(s):**

Kapwa Consulting Stakeholder Power Analysis Tool

Stakeholder Power Analysis
Complete this analysis to understand the relative power dynamics between various stakeholders involved in your project and understand specific needs that can be addressed in your stakeholder strategy.

1) Determine what your project question and if the project dynamic is:
   a. Process, decision-making oriented: X/Y Variables are Impact/Influence
   b. Service, program oriented: X/Y Variables are Need/Access

2) Create your stakeholder power analysis chart using the example below:
   (Y axis) Impacted by Decision: Impact is identified by having a positive/negative or missed opportunity to share in the benefit of a Policy or Plan.
   (X axis) Influence in Process: Defined by time, resources, information, familiarity with process and real or perceived ability to influence outcomes.
   OR
   (Y axis) Need: Level of benefit that can be realized through a program or service or vulnerability to the risks of a problem the project seeks to solve
   (X axis) Opportunity/Access: Potential to be advanced (i.e. financially, professionally, in health, or in community well-being). Ability to currently participate or receive the benefits of a program.

Put stakeholders groups in the appropriate quadrant. Break down broad stakeholder groups into sub groups if there are differences in influence or impact within a category (ex. not all small businesses may be equally impacted). Put stakeholders in particular spots within each quadrant.

Key:

- Quadrant 1: Highly impacted, little influence: This group should be prioritized for inclusion and equity strategies.
- Quadrant 2: Highly impacted, high influence: This group will likely already be at the table. Manage their continued participation, and sharing influence with those in Quadrant 1.
- Quadrant 3: Low impact, low influence: This group is not an obvious priority. However, communication should be maintained to honor transparency should they eventually shift into another quadrant.
- Quadrant 4: Low impact, high influence: This group should be consulted with for their expertise and influence. Strategies should focus on leveraging power to further advance position of stakeholders in Quadrant 1.

3) Analysis questions
   Question 1: Who are the stakeholders impacted by this initiative?

   Question 2: Are any of the following groups of stakeholders considered within the initiative, and where do they fall? (You can identify more specific groups within each category)
   - Communities of color
   - Low-income populations
   - Limited English Proficient communities
   - Community based organizations and groups
   - Interest based organizations and groups
   - Churches and faith based groups
   - Neighborhood coalitions or associations
   - Neighborhood groups
   - Property owners
   - Renters
   - Business
   - Business organizations (associations, chambers of commerce, business districts)
   - Employees (unions, non-unionized)
   - Institutions (education, health, correctional)
   - Local government officials and advisory bodies
   - Local government departments
   - Tribal sovereign nations
   - Other public agencies
   - Other stakeholders

   Question 3: Do certain stakeholder groups carry more influence/access than others in your initiative? Why?

   Question 4: What community engagement strategies will you use to ensure under-represented/under-served stakeholders (Quadrant 1) have more equitable influence/access?
### SFE Racial Equity Program and Policy Scan Tool

**Purpose:** Identify existing initiatives and ongoing program work at SF Environment with significant opportunities to advance racial equity. The initiatives and program work identified will be referenced in SFE’s Racial Equity Action Plan and will be prioritized for an in-depth racial equity assessment. **Please complete a worksheet for each major initiative or work area within your Program.** Estimated time to complete: 2 hours.

#### STEP 0 - General Information

<table>
<thead>
<tr>
<th>Program Area</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name of initiative, policy or ongoing program work</td>
</tr>
<tr>
<td>Brief description. Include background information (why is this happening/a priority?)</td>
</tr>
<tr>
<td>What dedicated financial resources are there? (staff time and/or other)</td>
</tr>
</tbody>
</table>

- **Staff time:**
- **Materials:**
- **Publicity:**
- **Grants/Contracts:**
- **Outreach:**
- **Other:**

#### STEP 1 - Desired Results/Outcomes

What is the desired outcome of this initiative? Think about impact.

#### STEP 2 - Benefits and Burdens Analysis

- Who is this initiative intended to serve?
- What data do you **have** to identify who benefits and who is burdened? (include quantitative and/or qualitative data)
- What data do you still need to understand who benefits and who is burdened?
- Who receives the benefits? (Also consider who might benefit financially)
- What are barriers to accessing the benefits?
- Who is/could be burdened?
- What are/could be the unintended consequences?

#### STEP 3 – Stakeholder Power Analysis

Who are the stakeholders impacted by this initiative? (check all that apply)

- Communities of color
- Low-income populations
<table>

Who is involved in major decisions? Do certain stakeholder groups carry more influence/access than others in your initiative? Why?

Where does this initiative lie on the spectrum on community engagement? (see community engagement table at end)

Was community engagement conducted when the initiative was started? Why or why not?

Was community engagement conducted on an ongoing basis? Why or why not?

**STOP HERE: STEPS 4-6 to be completed by Racial Equity Committee with program staff input**

**STEP 4 - Strategies for Racial Equity**

How might you remove barriers for those who have been unable to access benefits?

How might you remove or mitigate burdens and unintended consequences?

What community engagement strategies will you use to ensure low-income communities of color have more equitable influence/access?

What tools and/or actions are available to achieve the strategies described above?
STEP 5 – Racial Equity Implementation Plan

How can we implement these strategies?

What resources might be needed?

What additional data or community engagement is necessary?

STEP 6 – Racial Equity Communications & Accountability

How would you evaluate and report back on progress towards meeting desired outcomes?

Is there a way to receive and incorporate feedback about the program?

Spectrum of Community Engagement to Ownership, Credit: Rosa González of Facilitating Power
