

RISE-IN

RESILIENT INVESTMENT FOR **SUSTAINABLE** **ENVIRONMENTS**

RISE-IN pioneers a new approach to climate adaptation by bridging the gap between environmental resilience and financial viability. Focusing on nature-based solutions (NBS) for flood risk management, the project introduces the concept of BANKABILITY READINESS LEVEL (BRL) – a novel metric to assess, enhance and unlock investment potential of climate-resilient solutions.

26

Consortium Members from 13 Countries

Through a unique blend of climate risk assessment, stakeholder co-creation, and social innovation, RISE-IN transforms cities into living labs for sustainable, scalable, and financially attractive interventions.
